

Math 170E Discussion Section Information/Logistics

1. Instructor: [Dr. Mitia Duerinckx](#)
2. Teaching Assistant: [Osman Akar](#)
3. **Discussion Time** (all times in PST).
Thursdays 12-12.50pm at MS 5117
Meeting Link: <https://ucla.zoom.us/j/91051914552?pwd=ZUlnctRaWUJGKzNyNjNxb2ZTQ05vdz09>
Meeting ID: 910 5191 4552, Passcode: 488799

4. **Office Hours:** You are most welcomed to attend the office hours, even when you don't have questions but you want to see other student's questions, or you just want to chat in general. I was also UCLA undergrad and I have spent almost 7 years here, so I have quite an experience of being a math major.

I plan to hold both in person and online office hours (via zoom of course), but this is subject to change. Of course the first two weeks OHs will be via zoom.

- **Zoom OH:** 1-2pm on Thursday. Subject to change. Zoom link is the same as the open OH link.
- **Open OH:** 9-10am on Tuesdays. Here is the zoom link details:
<https://ucla.zoom.us/j/97532843825?pwd=RldkOElsd25Lc0pYT3R1NTgrbDBKQT09>
Meeting ID: 975 3284 3825, Passcode: 896714

5. Email: oak@math.ucla.edu.
6. Email Policy: Please do not send me math questions via email, instead I prefer you to come to my office hours. It is quite time consuming to answer math questions via email because I cannot write mathematical symbols easily.
7. Once we get back in person, I plan to broadcast and record the live discussion sessions, and upload the recording to the canvas. However, undeniably there will be technical errors throughout the quarter, so safest way to attend discussion is in person (again, this statement holds once we get in person).
8. Useful Links (Free materials UCLA offers):
 - (a) MATLAB is free for UCLA Students: <https://softwarecentral.ucla.edu/matlab-getmatlab>
 - (b) Microsoft Office is also free: <https://www.it.ucla.edu/news/microsoft-office-proplus>
 - (c) You can read *The Economist* magazine for free if you are on UCLA network. If not, you can use [UCLA VPN](#). See here for more info <https://www.anderson.ucla.edu/rosenfeld-library/databases/business-databases-by-name/economist>. Note that being on UCLA network is also useful to download articles from a number of publishers and also from UCLA library.
